

# Olefins & Derivatives

The quickly changing nature of the European and Middle Eastern ethylene and propylene markets and their relationship to end-use product markets requires insightful, timely analysis. With over thirty years in the consulting business, CMAI

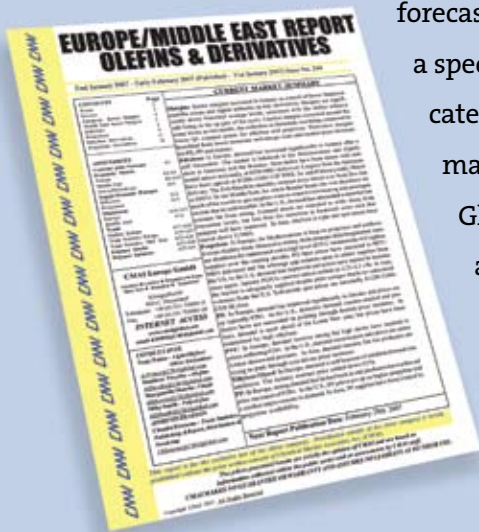

has a staff of professionals with experience in marketing, purchasing, production, R&D, technical service, commercial development and market research, that can bring you the most concise package of analysis, interpretation and forecasting for light olefins and related products.

The **Europe/Middle East Olefins & Derivatives Market Advisory Service** provides clients with a comprehensive, yet focused view of the European and Middle Eastern light olefins and derivatives markets. It details the relationships

with upstream feed sources and downstream markets and provides an analytical view of the complex ethylene and propylene markets. This service provides a balance of monthly updates on pricing and supply/demand events, analysis of the ever changing market dynamics and an appendix containing historical and forecast supply/demand information, trade data, operating schedules, price

forecasts and new project listings. These reports include a specific focus on the ethylene and propylene product categories, with an overview of the major derivative market dynamics for polyethylene, PVC, Ethylene Glycol, Polypropylene, Acrylonitrile and Oxo-alcohols. In addition, CMAI's web-based pricing database provides current and forecast pricing and production economics for the above mentioned products.

If what you know does not equal what you need to know about the complex and volatile Europe and Middle East ethylene and propylene markets, then CMAI's Europe/Middle East Olefins & Derivatives Market Advisory Service will help you balance your information equation.
